

# Email Services

## Secure, Layered Email Filtering and Defense

At RDI, we engineer, update, and continually improve our in-house hosted email services for secure business that reduces IT headaches. Our approach uses a layered defense to stop spam, phishing, and malicious emails before they reach your staff – this reduces the possibility of malware, viruses, or ransomware compromising your network security and integrity. In addition to a secure, managed email platform, we offer information and training to educate your staff on proper email protocol and procedures to avoid potential threats.

### Effortless Email On The Go

Business never stops and email has to be accessible from anywhere and at any time. With RDI email, you can enjoy access on practically any mobile phone or tablet. With RDI, you'll also get mobile sync to

keep your email, calendars, and contacts always synchronized with webmail access on your iOS, Android, or Windows device.

### The Email You Deserve

Choosing the right email hosting package can have a large impact on the way you do business. After all, you rely on your business email account to help you accomplish so many things. That's why it's important to find an email service that offers you the features you need – like plenty of storage, spam and virus protection, webmail and even document sharing. With RDI mail, you'll have an email address that matches your domain name, giving you instant credibility. Not sure what to choose? We can help by listening to your business needs and recommending the best service to meet your budget; you'll receive professional email at a price your business deserves.

#### Email @your-company.com
